# Shaft Extractor

## INDUSTRIAL DUTY

Integrate with Mechadyne Core Bins for complete extraction-recoring-insertion automation

SEW Gearmotors for demanding mill environments...

Mechadyne Shaft Extractor-Inserters are built for demanding mill environments which require continuous operation, 24 hours a day, 7 days a week. Using state-of-the-art electronic controls, the shaft extraction-insertion function can be automated, reducing man-power and cost. These "best in class" Shaft Extractors include:

- Hydraulic Scissors Lift for Height Control
- Safety Skirt Around Scissors Lift
- Electric Belt Drive for Extraction-Insertion
- 5,000 lb Plus Weight Capacity
- 200 Inch + Shaft Length Capacity
- Interfaces with Mechadyne Core Storage bins

*...a revolution in roll packaging!*
