

Roll Identification Systems

- Safe, Simple and Reliable – NO complex ROBOTICS
- Continuous Barcodes around Roll circumference
- Text, numbers and symbols can be printed on additional lines – also around Roll circumference
- Scan Barcodes from any position around Roll
- Large Barcodes for easier scanning from long distance

Barcodes printed around circumference of roll

Roll Labeling

INKJET PRINTING

INKJET PRINTED BARCODES eliminate scanning difficulties associated with typical Roll labels because the Barcodes are printed continuously around the Rolls' circumference enabling scanning from virtually any position.

INKJET PRINTED BARCODES are **LARGE** and **BOLD** for ease of scanning from longer distances and difficult angles.

Ink Jet Printed Barcodes are printed directly onto the Roll surface (wrapped or unwrapped) to reduce overall "labeling" costs.

...a revolution in roll packaging!

TECHNICAL SUPPORT

From start to finish our Technical Support program ensures that ALL technical details are covered during the project phase and that post installation assistance is only a phone call away.

MINIMUM DOWNTIME

In many instances there may be NO downtime required for the installation and commissioning of new Ink Jet Printing equipment.

CUSTOM SOLUTIONS

Each and every application is unique so "one size" does not fit all. Although we utilize standard, well proven "modules" throughout, the combinations and configurations of these "modules" is engineered for

IMMEDIATE BENEFITS:

Eliminate Barcode scanning difficulties that hinder efficient identification and transport of Rolls from the packaging line to the warehouse OR from the warehouse to the shipping unit (trailer, railcar or container).

Improve the appearance and quality of the rolls your company manufactures. Provide your customers Rolls that are easy to scan and identify when received at their dock.

And in the process of all these improvements your overall cost of conducting day to day business will be lowered.

Our Ink Jet Printing equipment is well proven, simple and easy to maintain, designed and manufactured specifically for each unique application but, most of all, **very competitively priced.**

AVAILABLE FEATURES:

- Barcode, text or numbers up to 2.5" high
- All standard Barcode symbologies – Code 128 recommended
- Printing at Top, Bottom, Center or any other positions on Roll – as required
- Wide variety of ink types to match specific application
- Precision jewels set in stainless steel printhead faceplate provides dramatically lower ink consumption AND increased reliability
